We determine the MAP assessment points by multiplying the national percentile ranking by 1.515 points for both the reading and math percentiles separately (left), and multiply by 3.03 for the entrance exam percentile (right).

Overview

The application scoring system has three main parts: Seventh grade MAP assessment (33.3% of the total), seventh grade final grades for core subjects (33.3%), and the entrance exam (33.3%). The weights for the different parts are established by using a total of 900 points, with each 33.3% element worth 300 points.

Seventh grade MAP assessment

We multiply the percentile ranking of the reading score by 1.515 to get a maximum score of 150, and we multiply the percentile ranking of the math score by 1.515 to get a maximum score of 150, so that reading and math together yield a maximum of 300 points. You can use the table at the far left to look up your score.

Seventh grade final grades

Points are calculated for reading, mathematics, science, and social studies. Each 'A' grade is worth 75 points, each 'B' is worth 50 points, and each 'C' is worth 25 points. No points are awarded for a 'D' or an 'F' grade. A student with four As will get the maximum of 300 points, while two As and two Bs are worth 250 points. You can use the top middle table to determine your point totals.

We determine the entrance exam points by multiplying the total national percentile rank by 3.03 to get a maximum of 300 points. You can use the table immediately to the left to determine your exam score.
